Owner's General Assessment: " Our university provided vision care, but we will be removing the optometric equipment. The interior can be easily converted to a mobile medical clinic with capacity for 2-3 exam/consultation rooms. We've used the mobile clinic infrequently during the past several years. However, it has been garaged and maintained to pass vehicle inspection and annually tested to meet CA emissions regulations. The engine is reliable and is an easy drive. The vehicle is in pristine condition".
